

# Land Ownership Conrad, MT

## Map 4

### Vicinity Map

Land ownership information shown on this map is derived from the Montana cadastral survey data. The cadastral data is a framework built primarily upon the measurement-based cadastral reference of the Geographic Coordinate Database (GCDR) maintained by the BLM, with tax parcels as defined by the Dept. of Revenue.

The Cadastral NSD/MSD simplifies subtleties in land ownership by providing cadastral information in different components, cadastral reference (GCDR PLUS in Montana), parcels, and related coincident geometry (trust holds, stipulations, subsurface rights, boundaries, etc) which all carry a core set of information. Other spatial data (base maps) were obtained from the Montana Geographic Information Clearinghouse - Montana Natural Resource Information System (NRIS).

This map was prepared September 2010 by Global Positions, LLC as part of the Pondera County Growth Policy Project.

Projection: Lambert Conformal Conic  
Coordinate System: State Plane, Zone 2000  
Units: Meters Datum: NAD1983

## Legend

### Ownership

- Private
- Local Government
- State Government
- Right of Way

### Map Features

- Municipal Boundary\*
- Asphalt Surface
- Gravel Surface
- Water Features

\* Municipal boundary is courtesy of local sources
