

## Conservation Easements

Map 14

This map reveals lands with conservation easements. The data on this map was originally developed by the Montana Natural Heritage Program (MTNHP) as part of its Montana Stewardship layer. The MTNHP easement layer was integrated with the Montana Cadastral Layer by the Montana Base Map Service Center, which maintains the most current version of the layer. Spatial data (base maps) were obtained from the Montana Geographic Information Clearinghouse - Montana Natural Resource Information System (NRIS).

This map was prepared June 2010 by Global Positions, LLC as part of the Pondera County Growth Policy Project.
