

*Pondera County*  
**Population Density**

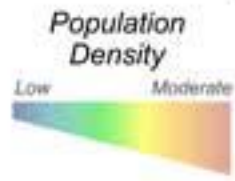

Map 4

This population density map gives a general overview of the population density in various parts of Pondera County. Population density is shown to be highest in Conrad, Valer and other communities. Alternatively, low population density are shown in areas with few structures. Structures, which include residential homes, businesses and other occupied buildings were mapped by MAPS, Inc. as part of the Pondera County's Enhanced 911 System. Each point represents an individual structure. Structure Data for Heart Butte were collected by Montana Prescribed Fire, Inc. and Global Positions, LLC during the summer of 2005 as part of a wildland fire study.
